React.js, Redux, JavaScript, Node.js, Sequelize, Express.js, Python3, Flask, SQLAlchemy, HTML5, CSS3, SQL, SQLite3, postgreSQL Git, AWS, Render, Docker

Projects
Fifth-Fleet   [live site](#) | [github](#)

React, Redux, JavaScript, Node.js, Sequelize, Express, CSS3, AWS, Websocket

Small scale live-chat and community application for Monster Hunter fans

- Incorporated AWS services for hosting, uploading, and retrieval of user provided images
- Established unique identifiers for chat connections through websockets which send responses only to specific clients
- Created documentation and comments to denote expected code behavior and to alleviate future refactoring

Level Up   [live site](#) | [github](#)

React, Redux, JavaScript, Python3, SQLAlchemy, Flask, CSS3

Habit forming and task tracking application based on Habitica

- Oversaw group's codebase through github to ensure branches were protected, managed pull requests, resolved merge conflicts, and deployed for production
- Analyzed source code to accurately capture the layout and visual style of the target site. through CSS
- Coordinated with team members towards unifying code for a single, cohesive application

Experience
Warehouse Attendant, Bridgestone | November 2022 - Present

- Made use of RF scanners with proprietary inventory software and operated heavy machinery such as forklifts
